**Treasure Valley Family YMCA
YMCA Horsethief Camp
COVID-19 Screening Tools and Protocols
Updated as of June 8, 2021**

This tool is intended to screen Treasure Valley Family YMCA Horsethief Camp attendees for conditions that would prevent them from being at camp under COVID-19 protocols. At minimum, we will follow local, state, and national directives.

A Check-in and Temperature Screening will be conducted during check-in and a Daily Screening and Temperature Check will occur every morning at camp.

**Check-in Protocol
Health Screening and Temperature Check**

Staff will review the screening tool with the attendee and/or their parent or guardian and will take the attendees temperature.

- If an attendee has a temperature of 100.4 °F or higher, have them wait in an isolated area for 15 minutes and then re-take their temperature with a different thermometer.
- If attendee's second temperature check is still 100.4 °F or higher, follow the **Symptom & Exposure Decision Tree (Page #3)**.

Note: If attendee's second temperature check is below 100.4 °F, they may attend Camp.

COVID 19 Camp Horsethief Attendee Check-in Screening Questionnaire

Step 1: Symptoms	Do you have any of the following symptoms today:		
	1. Fever (100.4 F or higher), or a sense of having a fever?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	2. A new cough that you cannot attribute to another health condition?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	3. A new shortness of breath that you cannot attribute to another health condition?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	4. New loss of taste or smell?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
Step 2: Additional Symptoms	Are you exhibiting any of the following additional symptoms:		
	5. Chills?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	6. Fatigue	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	7. Muscle or body aches?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	8. Headache?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	9. Sore Throat?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	10. Congestion or runny nose?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	11. Nausea or vomiting?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	12. Diarrhea?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
Step 3: Asymptomatic Questions			
	13. Have you tested positive for COVID-19 in the last 10 days or are you waiting for the results of a personal COVID-19 test?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	14. In the last two weeks, have you or a member of your household travelled internationally, outside of the United States?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	15. In the last two weeks, have you been exposed to a person known or suspected to have COVID-19 (including someone who was experiencing new symptoms consistent with COVID-19)?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	16. Have you been vaccinated within the past (2) days (Pfizer-BioNTech/Moderna/Johnson & Johnson)?	Yes <input type="checkbox"/>	No <input type="checkbox"/>

IF attendee (or parent/guardian) answers, "YES," to:

- One or more in Step 1
- Two or more in Step 2

Follow the [Symptom & Exposure Decision Tree \(page #3\)](#).

***Follow this decision tree for attendees that are symptomatic even if they are vaccinated.**

If attendee (or parent/guardian) answers, "YES" to questions 13 through 15 please follow the applicable guidelines starting on page 4

Symptom & Exposure Decision Tree

Q1: Are you experiencing COVID-19 symptoms? They include:

(One or more of these symptoms that is a new onset or is an increase in severity)

» **Fever*** (100.4°F or 38°C) without having taken any fever-reducing medications, such as acetaminophen or ibuprofen.

» **Cough***

» Muscle aches

» **Sore throat***

» Shortness of breath

» Chills

» New or unusual headache

» Nausea, **vomiting***, **diarrhea***, or loss of appetite

» Fatigue

» Congestion or runny nose

*The presence of any of these symptoms generally suggest an attendee or staff member has an infectious illness and should not attend camp, regardless of whether the illness is COVID 19. Attendees should not attend camp in person if they or their caregiver identifies new development of any of these symptoms.

YES, I HAVE SYMPTOMS

NO SYMPTOMS

Q2: HAVE YOU-

2.1: Had close contact with a confirmed or suspected case?

2.2: Travel to or live in an area that is designated Category 3 (Substantial Community Transmission) (<https://www.cdhd.idaho.gov/dac-coronavirus-schools.php>)

2.3: Recently had a COVID-19 test pending?

YES, to 1 or more

NO

Quarantine yourself and contact your healthcare provider (HCP).

If **YES** to 2.1: Isolate for 10 days from onset of symptoms.

Stay home until you are fever free without medication for 24 hours, symptoms have improved or resolved and you are able to pass the health screener.

If **YES** to 2.2 and you received an alternate diagnosis or negative test result, stay home until you are fever free for 24 hours and symptoms have improved enough so that you can pass the check-in health screener.

If **NOT tested**: Isolate for 10 days from onset of symptoms.

If **YES** to 2.3: Isolate until you receive your test results.

Have you been in contact with someone who has been diagnosed with or tested positive for COVID-19? (within 6 feet for 15 minutes or more)

YES

NO

Have you been fully vaccinated (>2 weeks after receiving the 2nd does in a 2 dose series (Pfizer-BioNTech or Moderna) or > 2 weeks after receiving a single dose vaccine (Johnson & Johnson)?
***proof of vaccination will be required**

What caused you to be tested? You may not complete the check-in process. Staff will contact Risk Management for further instructions.

YES

NO

You may continue the camp check-in process.

You may not attend camp for at least 10 days after your last exposure; if you test negative at least 5 days after exposure, and continues to have no symptoms and can pass the check-in screening, you may return to camp 7 days after exposure instead of 10.

*day of exposure is day 0.

* NOTE for 2.1: The 10 days starts when Person A has their last exposure to Person B while Person B is contagious (Exposure, as defined above, is identified as living in the same house OR having close contact, defined as < 6 feet for 15 minutes or longer OR being in direct contact with secretions from a sick person (e.g., being coughed on, kissing, sharing utensils, etc.)). So, in other words, the 10 days starts after the last day that Person A has contact with Person B or, if still in contact with Person B, once Person B is no longer contagious, which is at least 10 days after symptom onset, with no fever for 24 hours (without use of medicine), and other symptoms have improved

If attendee answers “YES” to question #13:

#13. Have you tested positive for COVID-19 in the past 10 days or are you waiting for the results of a personal COVID -19 test?

If you tested POSITIVE within the past 10 days, you may not continue the check-in process. You are eligible to return after 10 days from the onset of symptoms, (diagnosis if asymptomatic), all symptoms have improved AND after 24 hours of no fever.

If you are currently awaiting test results isolate until you receive your test results.

If attendee answers “YES” to Question #14:

#14. In the last 2 weeks, have you or a member of your household travelled internationally, outside of the United States?

International Travel Recommendations and Requirements	Not Vaccinated	Fully Vaccinated
Get tested 1-3 days before traveling out of the US	✓	
Mandatory test required before flying to US	✓	✓
Get tested 3-5 days after travel	✓	✓
Self-quarantine after travel for 7 days with a negative test or 10 days without test	✓	
Self-monitor for symptoms	✓	✓
Wear a mask and take other precautions during travel	✓	✓

*Center for Disease Control and Prevention, CDC, April 27, 2021; [International Travel During COVID-19](#); May 13, 2021 [Interim Public Health Recommendations for Fully Vaccinated People](#)

- Attendee is **not** vaccinated will need to follow the CDC guidelines below for International travel and may not attend Camp if it has not been 7 days with a negative test or 10 days without a test since travel/quarantine period.

- If attendee **is fully vaccinated** (2 weeks after their second dose in a 2-dose series, such as the Pfizer or Moderna vaccines, or 2 weeks after a single-dose vaccine, such as Johnson & Johnson vaccine) they do not need to quarantine and may attend Camp.
- If Attendee has recovered from a documented COVID-19 infection within the last 3 months, follow all requirements and recommendations for fully vaccinated travelers except you do NOT need to get a test 3-5 days after travel unless you are symptomatic. People can continue to test positive for up to 3 months after diagnosis and not be infectious to others.**
- Staff will add a dot next to the attendee's name on the roster and one on the attendee's **Safe Kid Card**.
- Staff must leave the dot on the attendee's **Safe Kid Card** throughout the rest of the week of camp.
**Center for Disease Control and Prevention, CDC, May 3, 2021; After International Travel

If attendee answers "YES" to Question #15

#15. In the last 2 weeks, have you been exposed to a person known or suspected to have COVID-19 (including someone who was experiencing new symptoms consistent with COVID-19)?

Follow the Symptom & Exposure Decision Tree (Page #3) → NO SYMPTOMS

If you have had Covid-19 and recovered:

- People who have had Covid-19 and recovered do not need to quarantine for 90 days (3 months) after the illness, if newly exposed to someone who is infected as long as they remain symptom free.

*Center for Disease Control and Prevention, CDC, March 12, 2021 – When to Quarantine

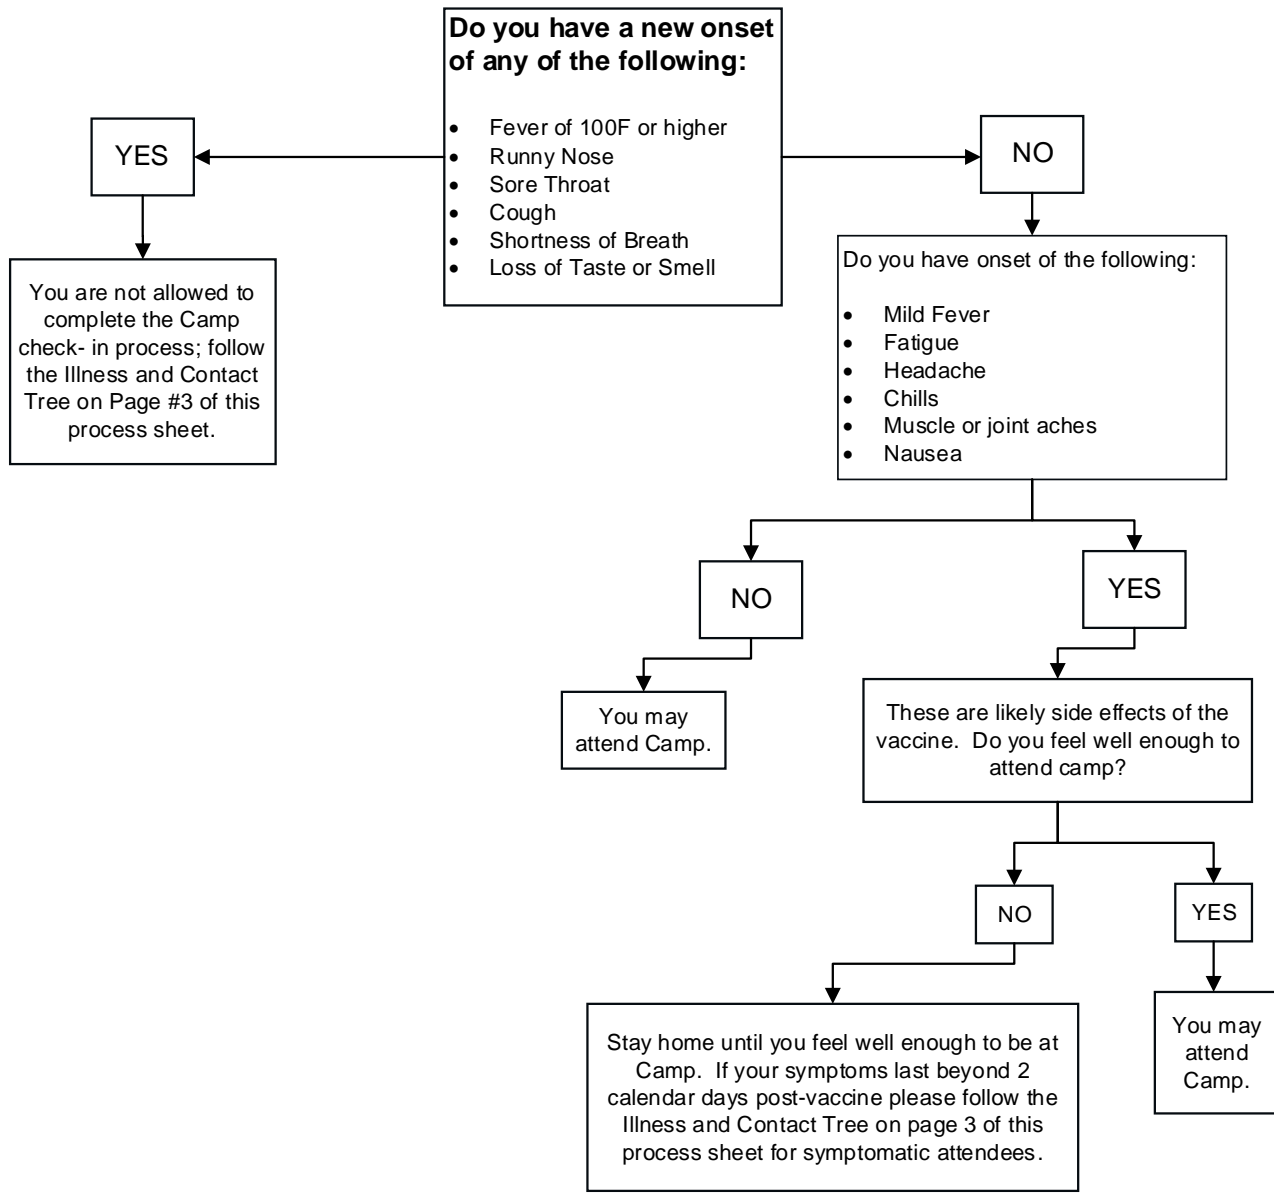

If attendee answers "YES" to Question #16

#16 Have you been vaccinated within the past 2 days [Pfizer-bioNTech/Moderna/Johnson & Johnson]?

Follow the Attendee Post-Vaccine/Post-Recovery Screening Tool (Page #6)

*Attendees who have non-COVID-19 symptoms that last beyond 2 calendar days post-vaccination should follow the regular screening process for symptoms.

Attendee Post-Vaccine/Post-Recovery Screening Tool

Attendee Daily Screening Protocol (AFTER passing Check-In Screening Questionnaire)

This tool is intended to screen Treasure Valley Family YMCA Horsethief Camp attendees for conditions that would prevent them from staying at camp under COVID-19 protocols. At minimum, we will follow local, state, and national directives. A Daily Screening and Temperature Check will be conducted every day by a YMCA staff member.

COVID-19 Camp Attendee Daily Screening Questionnaire			
Step 1: Symptoms	Do you have any of the following symptoms today:		
	1. Fever (100.4 F or higher), or a sense of having a fever?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	2. A new cough that you cannot attribute to another health condition?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	3. A new shortness of breath that you cannot attribute to another health condition?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	4. New loss of taste or smell?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
Step 2: Additional Symptoms	Are you exhibiting any of the following additional symptoms:		
	5. Chills?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	6. Fatigue	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	7. Muscle or body aches?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	8. Headache?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	9. Sore Throat?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	10. Congestion or runny nose?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	11. Nausea or vomiting?	Yes <input type="checkbox"/>	No <input type="checkbox"/>
	12. Diarrhea?	Yes <input type="checkbox"/>	No <input type="checkbox"/>

Health Screening and Temperature Check

- Staff will review the screening tool with the attendee and will take their temperature.
- If an attendee has a temperature of 100.4 °F or higher, they may wait in an isolated area for 15 minutes and then re-take their temperature with a different thermometer. Additional consideration regarding the attendee’s activity level at the time their temperature was taken will be taken into account.
- If attendee’s second temperature check is still 100.4 °F or higher, follow the **Symptom & Exposure Decision Tree (Page #3)**
- If attendee’s second temperature check is below 100.4 °F, they may stay at Camp

If attendee answers “YES” to one or more in Step 1 OR 2 or more in Step 2 OR develops symptoms during the day:

- The attendee will be isolated as soon as possible and the nurse will have a further conversation with the attendee and review the **Symptom and Exposure Decision Tree** (page 4). If the nurse, in their professional opinion, feels that the symptoms are not the result of a specific occurrence at camp and are, instead, a potential risk of COVID-19, then the parent will be called to pick up the attendee.

- The Camp Nurse should notify the Camp Associate Branch Directors and submit a COVID-19 Incident Report. The form can be found on the [Safety and Risk Portal](#).

If an attendee is tested and confirmed positive for COVID-19, the Y will follow its COVID-19 Action Plan for confirmed positive person.
